“Few people are better positioned than Pozen...to tell us what needs to be done to avoid a similar financial crisis in the future.”

—Stephen J. Hadley, *Harvard Business Review*

“...the book provides a valuable guide to a wide audience of readers, from American voters who felt disenfranchised by the events of September 2008 and are looking for an accessible resource to further inform their perspective, to professionals who seek a single source for an engaging account of the crisis and its implications for businesses today and tomorrow.”

—Elizabeth Leonard, *Forbes.com*

After two and a half years of relentless financial pounding, the crisis literature is becoming mountainous. ...any new book on the aberrations of the financial community has to have a clear focus and make a compelling case. In *Too Big To Save?* Robert Pozen, chairman of mutual fund group MFS Investment Management and a former vice-chairman of Fidelity Investments, pulls off the trick.

—John Plender, *FinancialTimes.com*

“University economists are already teaching courses on the history of the financial crisis of 2008 and the policy responses that followed. Robert Pozen's new book could become required reading.”

—Ross Kerber, *Reuters News*

“And in his big, new book, he lucidly discusses every salient subject related to the crisis—from Fannie Mae and Freddie Mac to hedge funds. That he never shies from controversy makes for much of the book's charm.”

—Jim McTague, *Barrons*

“Although mismanagement and moral hazard may be unavoidable, Pozen's prescriptions offer a navigable route to minimizing them.”

—*Business Week*

# Industry luminary Robert Pozen offers his insights on the future of U.S. finance.

The recent credit crisis and the resulting bailout program are unprecedented events in the financial industry. While it's important to understand what got us here, it's even more important to consider how we should get out. While there is little question that immediate action was required to stabilize the situation, it is now time to look for a long-term plan to reform the United States financial industry.

That is where Bob Pozen comes in. Perhaps more than anyone in the industry, Pozen commands the respect and attention of the public and private sector. In this timely guide, he outlines his vision for the new financial future and provides actionable advice along the way. To Pozen, there are four high-priority problems that must be addressed, and this book puts them in perspective

- Analyzes alternative models for government stakes in banks
- Recommends a new board structure for large financial institutions
- Examines the importance of broader Fed jurisdiction over systemic risks
- Proposes a way to revive the securitization of loans

With *Too Big to Save*, you'll learn the likely future of the finance industry and understand why changes have to be made.

**Robert Pozen** (Boston, MA) is Chairman of MFS Investment Management®, which manages over \$200 billion in assets for over five million investors. He currently serves as a senior lecturer at the Harvard Business School. He was chairman of the SEC advisory committee on improving financial reporting, which published its recommendations in August of 2008.
