OVERVIEW OF LEVEL II EXAM

- Level II offered 3 times in 2026: May, August and November
 - Switch to exam preparation mode about 30 days before test
- 88 total multiple-choice questions across 22 item sets/vignettes
 - Average of 4 multiple choice questions per vignette
 - Average of 3 minutes per multiple choice question
- 20 of 22 item sets will be graded; remaining 2 are “trial” and not graded
- Total Exam length = 4 hours 24 minutes, or 2 hours 12 minutes in each half, with an optional break
- Candidates are given 10-20 minutes to read each vignette and answer the corresponding questions

ETHICS TEST TIPS

- 10% - 15% of Level II Exam – Arguably most important topic since worth more
 - Ethics will have between 9 and 14 multiple choice of total 88 exam questions
 - May likely have 3 item sets/vignettes with 4 multiple choice questions each
- Should consider glancing at questions within each item set first before **actively** reading the vignette
 - If possible, identify the type of questions (see Strategy in answering questions below)
- Strategy in answering questions: Suggested approach
 - 1. Code or Professional Standards Question?
 - Most Questions will involve Professional Standards
 - 2. If Standards Question, which one?
 - 3. Identify Parties within the fact pattern to determine Standard
 - For example, CFA vs Employer (Std IV); or CFA vs Client (Std III)
 - Priority of Transactions (Client first, then Employer, then CFA)
- Read the vignette carefully; a possible Standards violation may be spotted by a single word within the hypothetical (e.g. “none”, “quickly”)

ETHICS TEST TIPS

- Read question and answer choices carefully (e.g. Std II Q needs Std II answer)
 - Beware of answers that may be distractors (e.g. Std III Q may have Std II and Std V answer choices)
- Generally, if **DISCLOSE** issues (e.g. conflicts) and **TIMING** of disclosure is adequate, personal action is allowed unless:
 - Breaks the law;
 - Standard specifically prohibits an action; or
 - Standard requires consent (e.g. Std IV Employer)
- Personal ownership of securities = Conflicts question (Std VI & III; Std VI & IV)
- Most questions will have an ethical issue
 - Why? Issues test candidates' understanding of concepts and practices
- Beware of specific answers on exam
 - Standards are more general than regulatory rules (e.g. 3 days to notify...)
- Know the difference between what is required by the Standards and what is good office practice (e.g. Informing clients of additional compensation arrangements when only employer consent is required under Std IV.B)

ETHICS TEST TIPS (CONTINUED)

- Concepts are straightforward; complexity is with overlapping standards
- Apply the process of elimination and use common sense
- Select BEST answer rather than look for CORRECT answer
 - Answers may have various shades of gray (i.e. correctness)
 - Get into the habit of going through each of the answer choices
- Highly recommend going through LM3 (“Application of the Code and Standards: Level II”)
 - 7 case scenarios with detailed explanations, 5 of which have case questions
- To prepare for this section, practice as many Ethics questions as possible
- On the exam, never ever leave a questions unanswered!
 - No penalty for guessing

ETHICS AND PROFESSIONAL STANDARDS

- Describe a Framework for Ethical Decision Making
 - Developing, maintaining and demonstrating a strong culture of integrity is the most important factor in promoting ethical behavior
 - Establishing an effective ethical blueprint or framework on how to act is a crucial step to engaging in ethical conduct
 - General ethical decision-making framework:
 - 1. Identify: Important relevant facts, stakeholders and duties owed, ethical principles, conflicts of interest (e.g. duty to client vs. duty to employer)
 - 2. Consider: Situational influences (e.g. behavioral biases), seeking additional guidance, identifying and evaluation alternative actions
 - 3. Decide and Act: Make a decision and act accordingly
 - 4. Reflect: Was outcome what was anticipated? All factors considered?
 - Framework application does not need to be sequential and is often iterative (i.e. repetitive to achieve desired result)

ETHICS AND PROFESSIONAL STANDARDS

- Code vs. Standards: Know the difference

Code = General guide for how members should act (what is obligatory and what is forbidden conduct)

Standards = Benchmark for minimally acceptable behavior by members

DESCRIBE THE 6 COMPONENTS OF THE CODE OF ETHICS: MEMORIZE!

The Code of Ethics

Members of the CFA Institute and candidates for the CFA designation shall:

- Act with integrity, competence, diligence, respect, and in an ethical manner when dealing the public, clients, prospects, employers, employees, colleagues in the investment profession, and other participants in the global capital markets.

- Promote the integrity and viability of the global capital markets for the ultimate benefit of society.
- Maintain and improve their professional competence and strive to maintain and improve the competence of other investment professionals.

NEW for 2025 Guidance for Standards I-VII

Update: Standard I Professionalism

New standard requiring members to act with and maintain the competence necessary to fulfill their professional responsibilities, this reinforcing the principle set forth in the Code of Ethics

Update: Standard V Investment Analysis, Recommendations, and Actions

Revision to Standard V(B) Communication with Clients and Prospective Clients to require disclosures about the nature of the services provided by members and candidates and the costs to the client associated with those services

Update: Standard VI Conflicts of Interest

The name of this standard has been updated to “Standard VI(A) Avoid or Disclose Conflicts” and revised the standard to require members and candidates to either avoid conflicts of interest or disclose those conflicts. Previously, there was no mention of avoiding conflicts of interest in the standard.

NEW Updates to Code of Ethics and Standards

Updated Code of Ethics Principle

As members work to promote and maintain the integrity of the markets, their actions should also help maintain the social contract with investors.

Old:

Promote the integrity of and uphold the rules governing capital markets.

New:

Promote the integrity and viability of the global capital markets for the ultimate benefit of society.

NEW New Standard Regarding Responsibilities of Supervisors [IV(C)]

The standard for members and candidates with supervision or authority over others within their firms was updated to bring about improvements in preventing illegal and unethical actions from occurring. The prior version of Standard IV(C) focused on the detection and prevention of violations. The updated version stresses broader compliance expectations, which include the detection and prevention aspects of the original version.

Old:

Members and Candidates must make reasonable efforts to detect and prevent violations of applicable laws, rules, regulations, and the Code and Standards by anyone subject to their supervision or authority.

New:

Members and Candidates must make reasonable efforts to ensure that anyone subject to their supervision or authority complies with applicable laws, rules, regulations, and the Code and Standards.

NEW Additional Requirement under the Standard for Communication with Clients and Prospective Clients [V(B)]

Given the constant development of new and exotic financial instruments and strategies, the standard regarding communicating with clients now includes an implicit requirement to discuss the risks and limitations of recommendations being made to clients. The new principle and related guidance take into account the fact that levels of disclosure will differ between products and services. Members and candidates, along with their firms, must determine the specific disclosures their clients should receive while ensuring appropriate transparency of the individual firms' investment processes.

Addition:

Disclose to clients and prospective clients significant limitations and risks associated with the investment process.

NEW Modification to Standard VII(A)

Since this standard was developed, CFA Institute has launched additional educational programs. The updated standard not only maintains the integrity of the CFA Program but also expands the same ethical considerations when members or candidates participate in such programs as the CIPM Program and the CFA Institute Investment Foundations certificate program. Whether participating as a member assisting with the curriculum or an examination or as a sitting candidate within a program, we expect them to engage in these programs as they would participate in the CFA Program.

Old:
Conduct as Members and Candidates in the CFA Program Members and Candidates must not engage in any conduct that compromises the reputation or integrity of CFA Institute or the CFA designation or the integrity, validity, or security of the CFA examinations.

New:
Conduct as Participants in CFA Institute Programs

NEW General Guidance and Example Revision

The guidance and examples were updated to reflect practices and scenarios applicable to today's investment industry. Two concepts that appear frequently in the updates in this edition relate to the increased use of social media for business communications and the use of and reliance on the output of quantitative models. The use of social media platforms has increased significantly since the publication of the tenth edition. And although financial modeling is not new to the industry, this update reflects upon actions that are viewed as possible contributing factors to the financial crises of the past decade.
